Career Objective

As a frontend-focused Software Engineer with around 1 year of experience, I am eager to join an innovative and dynamic company. Possessing expertise in technologies such as JavaScript and React. I aim to create intuitive, responsive, and engaging user interfaces. I am committed to contributing to a collaborative team environment, enhancing my skills in the UX/UI domain, and playing a role in the success of projects and the growth of the company.

Projects

Meals On Wheels

Jan 2023 – Feb 2023

- Website charitable organization that prepares and delivers a hot noon meal to qualified adults living at home who are unable to cook for themselves or maintain.
- Technologies used: Axios, Bootstrap, JSON Web Token (JWT), MySQL, React, Spring Boot and Stripe.

Know Your Neighborhood

Dec 2022 – Jan 2023

- Local neighborhood website app lets users register and log in with Facebook, share and find stores, and edit their profile.
- Technology used: React, Bootstrap, Spring Boot, Axios, JSON Web Token (JWT) and MySQL.

ABC Cars

Nov 2022 – Dec 2022

- Website app for trading used cars, letting users explore various options, bid on cars, and potentially buy them at lower prices.
- Technology used: Bootstrap, Spring Boot and MySQL

ABC Jobs

Aug 2022 – Oct 2022

- Job-finding website where users can sign up, log in, search others, edit profiles, post and comment on threads. Administrators can manage user data and send bulk emails.
- Technology used: Bootstrap, Spring MVC and MySQL

ABC Learning Center

Mar 2022 – Apr 2022

- Website for an IT training institute offering front-end and back-end web development courses.
- Technology used: NextJS, TypeScript and TailwindCSS

Healclin

Sep 2021

- UI/UX Design for a mobile application created for the community to register or consult with doctors, featuring services tailored to the Indonesian population.
- Technology used: Figma
